

## Snap-on Diagnostics – Certification for the Technician

Today's vehicles require computerized diagnostics to properly identify problems. Snap-on's line of diagnostic tools offers technicians the "fixed-right the-first-time" confidence, saving time and money. Snap-on diagnostic tools make up approximately 65% of the aftermarket automotive diagnostic tool market.

The capabilities of diagnostic tools are sometimes overwhelming, and technicians must have the skills necessary to operate and understand them. Certification raises the level of excellence for all in the industry, which assures vehicle owners and potential employers that the technician has the skill sets to repair computer-controlled vehicles successfully.

The true power of these sophisticated tools can only be fully realized with Snap-on certified training. Francis Tuttle's Snap-on certified instructors are ready to prepare you, the professional, for Snap-on diagnostics certification.

The diagnostic tools incorporated in the certification are:

**ETHOS (TM): 4hr class** Ethos is the quick go-to scan tool that complements the Snap-on family of scan tools. It is ideal for an entry-level technician, a service advisor, or a top-tech who wants quick answers to tough problems.

**SOLUS PRO(TM): 8 hr class** Solus PRO is the next step in the evolution of the Snap-on Scanner(TM). This tool communicates with the onboard computers to read and clear trouble codes, verify input readings, and simulate outputs on today's advanced computer-controlled systems.

**MODIS(TM): 8 hr class** MODIS is the all-in-one flagship of the Snap-on Diagnostic family. It combines, multiplies and exceeds the power of Vantage PRO and SOLUS PRO together into one unit. Its 4-channel lab scope, power graphing meter, component-test meter, scanner and more make it the most advanced diagnostic tool in the industry.

**ETHOS (TM): 4hr class** \$122.00

**September 25, 2008**
